In today's hyperconnected world, viral videos spread at lightning speed. One moment, a clip is private — the next, it's all over Twitter, Telegram, Instagram, or WhatsApp. But not every viral moment is shared with permission.

🔍 What's a Leaked Video?

A leaked video is **any personal, private, or intimate content shared online without the person's consent.**

It can happen through:

- Hacking

- Betrayal of trust
- Secret or unauthorized recording
- Screen capture or re-upload of private material

⚠️ These aren't just "clips" — they are **violations of privacy**.

❑ **The Hidden Cost of Going Viral Without Consent**

Sharing a leaked video might feel like "just passing it on," but the damage can be devastating:

- ▼ Emotional trauma and mental health struggles
- ▼ Career, family, and reputation damage
- ▼ Harassment, bullying, or blackmail
- ▼ Lasting shame and public judgment

It's easy to forget: **there's a real person on the other side of the screen.**

❑ **Pause Before You Share**

Before you watch, post, or comment, ask yourself:

- Did they choose to share this publicly?
- Is it ethical to watch or circulate this?
- Would I want my own private moment spread like this?

If the answer is "no" — close the tab. Don't engage. Don't fuel the harm.

🧑🏻👤❑ **What You Can Do Instead**

We all shape online culture. Here's how to make it better:

- ✓ Don't share or react to leaked/private videos
- ✓ Report the content and the platform hosting it
- ✓ Speak up against harmful behavior

- ✓ Offer empathy, not judgment, to those affected
- ✓ Educate others about consent and digital safety

♥ □ **Privacy is a Right, Not a Privilege**

Fame, scandal, or public status never cancel someone's right to dignity. Every person — celebrity or not — deserves control over their image, body, and voice. Let's stop treating leaked videos as "gossip" or "news."

🔒 **A Kinder Internet Starts With You**

Respect applies online just as much as in real life.
Be the reason someone feels safe, not exposed.
Be the reason the cycle of exploitation ends, not continues.
